SUMMARY

Passionate and skilled full-stack web developer with 3 years of experience in web development. Currently pursuing a degree in Computer Science and Engineering at Daffodil International University. Committed to continuous growth and adept at tackling extreme challenges in web development.

SKILLS

Comfortable: JavaScript, React, Tailwind, Bootstrap, Daisy UI, HTML, CSS, Framer motion

Familiar: Node.js, Express.js, MongoDB, Firebase

Tools: GitHub, GitHub Desktop, VS code, Postman, MongoDB Compass

PROJECTS

1. Bobbili Urban Development Authority (BUDA):

[live-link](#) | [host Link](#) | [client-side](#) | [server-side](#)

This project, successfully completed on [Fiverr](#), supports the Indian government's Bobbili Urban Development Authority.

- Think of it as a platform designed for different user groups like government officials (LTP, PS, Admin, UDA) and technical teams (Testing).
- Local building planners (LTP) can submit building plans and details. Local authorities (PS) can then review and approve these plans efficiently.
- LTPs can save partially completed applications and resume later, saving time and effort.

This project utilizes Google Drive for secure file storage, secure logins (JWT), and payment gateways (Paytm & Stripe) for seamless transactions. It's built with modern web development tools like Tailwind CSS, Daisy UI, React, and Framer Motion for a smooth user experience.

2. Track Down - Finding Lost Loved Ones (People Finder):

[live-link](#) | [client-side](#) | [server-side](#)

This website aims to reunite families with lost loved ones, especially children and the elderly.

- Users can upload a photo of the missing person, and the system utilizes advanced image processing with face recognition to find potential matches with high accuracy (around 95%).

This project leverages cutting-edge technologies like Face API, face landmark detection, and recognition models. It's built with modern frameworks like Tailwind CSS, Daisy UI, React libraries, and React Router for a fast and user-friendly experience.

3. RentUsBD - Simplifying Rentals in Bangladesh:

[live-link](#) | [client-side](#) | [server-side](#)

RentUsBD is an online platform that streamlines the rental experience for both renters and property owners.

- Owners can easily post their property details directly on the platform.
- Renters can quickly contact property owners and leverage the live chat feature for clear and efficient communication. Live chat fosters trust and facilitates communication, streamlining the rental process.

Tech Stack: Bootstrap, vanilla CSS, React, React Router Dom, Firebase, Spinner, Socket.io (real-time communication).

EXPERIENCE

Bulbi Urban Development Authority (BUDA)

Full-stack Web developer

India (Remote)

August 2023 to November 2023

Sheikh Russel school of future (SRSF)

Python project Trainer

Bogura, BD

December 2023 to June 2024

EDUCATION

Bachelor of Science in **Computer Science & Engineering**

CGPA: 3.51

Institution: Daffodil International University

Location: Ashulia, Savar, Dhaka

Duration: 2019 – 2023

LANGUAGE

Bengali (Native)--Fluent

English--(Good)
